

Dear FCC- I am writing to you to express my concern over the BPL technology that is being considered for further development. As an amateur radio operator with a great interest in Emergency Communication-A.R.E.S. I believe interference to the HF bands that this technology may bring (according to tests/studies that have been done) is something that is not in the best interest of the public which we serve in times of disaster and in public service if our reception and transmission in the HF bands is affected negatively by the BPL technology- Thank you for your attention, Sincerely,

Thomas E. Fuller
